Rate of Return (continued)

Your Personal Rate of Return: Your Personal Rate of Return measures the investment performance of your account. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. Reviewing Your Personal Rate of Return is important to help ensure you're on track to achieving your financial goals.

The performance of your investments is tracked since they have been held in the current account, but no earlier than Jan.1, 2009. This also includes investments you owned during this time period but have since sold. Certain events, including a transfer of an investment between accounts, share class conversion, or change in an investment's identification code (CUSIP) caused by a corporate action, will impact the time frame over which the investment's rate of return is calculated.

Rate of Return information on account statements uses the dollar-weighted calculation. Time-weighted Rate of Return numbers for Advisory Solutions Fund and UMA accounts can be found on your Quarterly Performance Report through Online Account Access. If you are not an Online Access user, visit edwardjones.com/access to sign up.

Information used to calculate performance may have been obtained from third parties and Edward Jones cannot guarantee the accuracy of such information.
